Steven M. Safier, M.D.
President and CEO
Montefiore Medicine
3332 Rochambeau Avenue
Bronx, NY 10467

Dr. Safier

All the nurses in our communities have worked tirelessly for years providing essential health services to the citizens of New York and are fighting for:

SAFE STAFFING RATIOS: to guarantee quality care for all those at your hospital. Patients need enough nurses to do the job with a minimum nurse and caregiver-to-patient ratios.

COMMUNITY ACCOUNTABILITY: “Community Outreach Committee.” Hospital management should make available appropriate facilities to meet with and interact with community residents and their representatives. It is imperative that committee members be permitted to chaperone stakeholders on tours of hospital facilities, after receiving proper notice.

SAFE & HEALTHY HOSPITALS: Management should insure that hospitals are places for healing and do not put patients at risk of exposures to environmental harm. Patients and families should feel secure in our hospitals. There must be a halt to Hallway patients!

As in our profession, we believe safe staffing is a matter of life and death. Without minimum nurse-to-patient ratios patient care is often sacrificed. Enough is enough!

We call on hospital CEO’s to do the right thing by Nurses and patients. Negotiate a fair contract with safe staffing ratios and end the use of hallways as a way to treat patients.

The Uniformed Fire Officers Association supports the registered nurses of NYSNA and will support them in their fight for Safe Staffing, Community Accountability and Safe & Healthy Hospitals. The health of the citizens of NY, our families and communities cannot wait.

Sincerely,
